

Minimum Requirements

There are a few minimum requirements for a CXR study to be processed by Annalise CXR:

Patient Age

Annalise CXR only supports studies for patients who are:

- 16 years or older

Annalise uses DICOM tags to determine patient age.

Supported Studies

Annalise Enterprise only supports studies containing chest X-ray images.

CXR Projections

Annalise Enterprise can analyse up to three (3) CXR images in total but requires:

- minimum one frontal (AP/PA) projection
